

MM Supply Hub: Operational Overview & User Guide

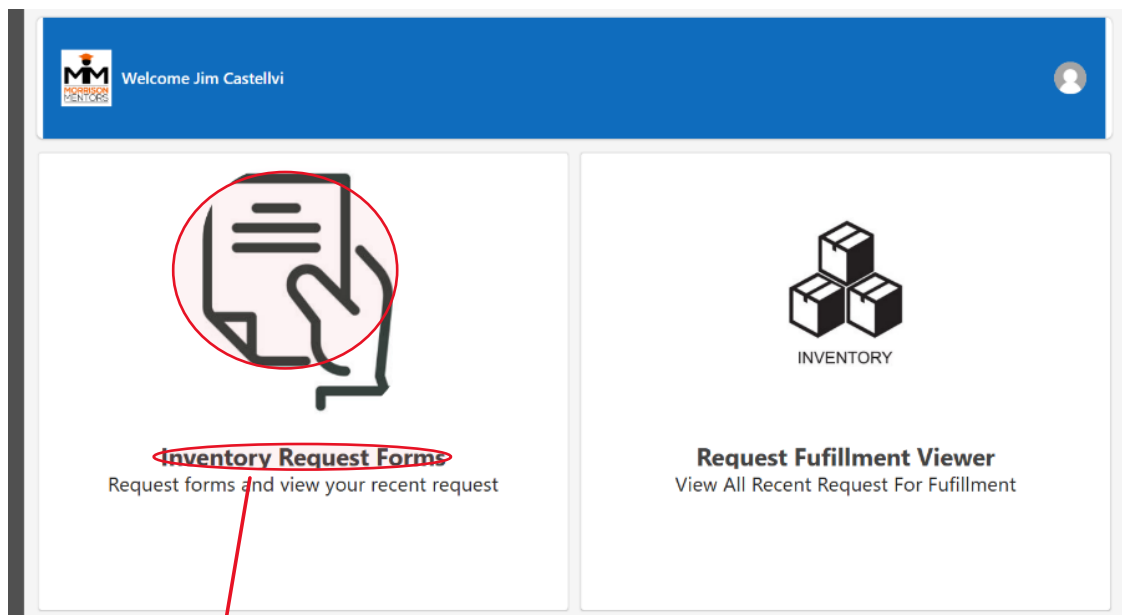

The **MM Supply Hub** is a centralized Power App designed to streamline the supply requisition process. By integrating automated data entry with real-time fulfillment tracking, the hub reduces manual errors and ensures instructors have the materials they need, exactly when they need them.

Desktop, Mobile, Tablet Responsive

Part 1: Instructor View (Placing a Request)

The Instructor interface is designed for speed and accuracy, utilizing auto-detection to minimize manual typing.

1. **Access:** Open the **MMSupplyHub** via Power Apps or the integrated Teams tab.
2. **Initiate Request:** From the Home Screen, select **Inventory Request Forms** (Left Button).

Click either the text or Icon

The screenshot shows the MM SupplyHub interface. At the top, there is a back arrow icon and the title "MM SupplyHub" with the subtitle "Request and track lesson supplies". Below this is a blue button labeled "New Supply Request", which is circled in red. A red arrow points from this button to the text "Create New" in the instructions below. Below the button is a section titled "Recent Request" with a search bar. Under the search bar, there are two entries. The first entry is for "Slime" from "Site_01", with a status of "Status: Pending", size 9, submitted on Mar 03, and a request ID of ef951826-21c6-4c7a-9893-43642d44c01bc. The second entry is for "Paper Circuits" from "Site_02", with a status of "Status: Pending", size 20, submitted on Feb 27, and a request ID of d538426a-12c1-46b8-8ea3-6dbfec2f71aa. Blue arrows point from the "Recent Request" section to the text "Request History" in the instructions below.

3. **Request History:** The landing page displays your recent requests ordered by date. [Click on any entry to view specific item details.](#)

4. **Create New:** Click the **New Supply Request** button to open the digital form.

5. Smart Form Completion:

- **Auto-Fields:** Your Name and Email are automatically detected.
- **Selection:** Choose your School, Grade, and Lesson from the dropdown menus.
- **Automated Totals:** Once a Lesson and Size (number of students) are entered, the app **automatically calculates** the required supply totals.
- *Note: For non-standard requests, set Lesson to "Custom Order" for a blank canvas.*

6. **Submission:** Click **Submit**. An automated confirmation email is sent immediately to the Inventory Team.

*Additional Supplies Button – Click to open up additional supplies button.

Part 2: Inventory View (Fulfillment & Logistics)

The Fulfillment Viewer provides the inventory team with a "Command Center" to manage and prioritize outgoing supplies.

Request ID: 879bd3b6-cc5a-4999-a907-0bcfb743eddc

Slime StemPlay

Site_04

Date Needed: Feb 27, 2026 - Date Submitted: Feb 27, 2026

Status : Pending

Finish

Disinfectant Wipes - Qty: 1 Container	☒ Packed
Paper Towels - Qty: 0 Batch	☒ Packed
Plastic Cover - Qty: 0 Batch	☒ Packed
Glue - Qty: 1 Bottle	☐ Packed
Activator - Qty: 1 Bottle	☐ Packed

2. Fulfillment Workflow

- **Quality Control:** Click an individual request to see the full packing list.
- **Verification:** As items are packed, users check them off in the app. The **Submit** button remains inactive until every item is accounted for, ensuring 100% order accuracy.
- **Closure:** Once submitted, the system sends an automated "Order Complete" email to the instructor.

Feedback System

Purpose:

Capture real-time user feedback during pilot rollout to improve system usability and performance.

Key Features:

- Auto-populated user data (Name, Email, Timestamp)
- Structured input fields for issue tracking and categorization
- Dropdown classification for:
 - Issue Type (Bug, UX Issue, Feature Request)
 - Impact Level (Low / Medium / High)
- Centralized logging via SharePoint for analysis and prioritization

Impact:

- Enabled structured feedback collection instead of informal communication
- Improved issue visibility and prioritization
- Supported faster iteration cycles during deployment
